

GETTING TO KNOW... SUMATRA, INDONESIA

FUNKY FACTS!

1. The titan arum can be found in the hot wet rainforests of Sumatra
2. The titan arum is the largest flowering plant in the world. It can grow up to three metres – as tall as an elephant!
3. The flower only blooms every seven to ten years and gives off a really bad smell. This attracts flies and insects to spread its pollen in order to create new plants.

W-URGH-D SEARCH!

Can you find all of the smelly items within this pongy puzzle?
