

Paper Tube Binoculars

crafts that inspire play

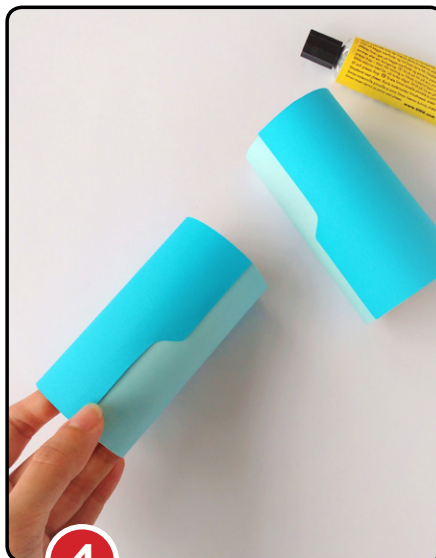

Gather your supplies. You will need: Coloured card (orange, white and two shades of blue), a black pen, two short paper-tube rolls, a pair of scissors, glue, and some thick cord.

For each roll: cut out a piece of light blue card - see the shape on the left. Cut another piece of card to the shape on the right from the darker blue. Finally, two narrow orange strips long enough to wrap around each end of the roll. Repeat these steps for the second roll.

First glue the light blue card onto one side of the roll.

Next glue on the dark blue card on the opposite side of the rolls as shown, so the rolls are now completely covered.

Finally, add the orange strips to each end of the rolls.

Paper Tube Binoculars

crafts that inspire play

Glue the two decorated rolls together as shown.

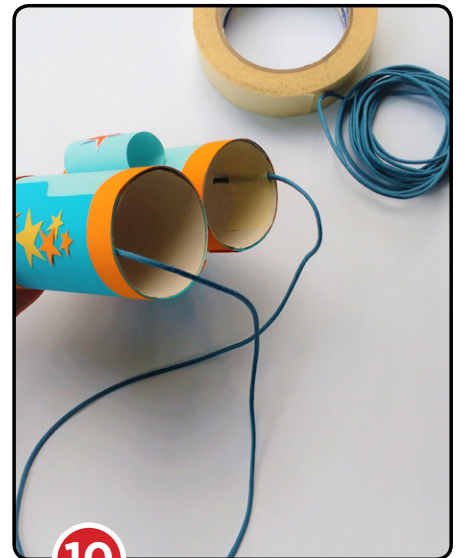

Cut out a rectangle of light blue card and roll it into a small cylinder, using glue to secure it. Glue this shape on top of the two rolls, centred as shown in picture 9.

Print and cut-out the decorative shapes on the supplied printable or create your own.

Glue the decorations on to the binoculars - use the completed photos as inspiration for the position of the shapes or better still, design your own pattern.

To complete the binoculars, cut a length of cord or wool long enough for the neck strap and secure the ends inside the rolls with a little bit of tape.
